

NEAR-SHORE PLATFORMS

BENEFITS

- Flexible configurations based on water depth and project requirements
- Over 18-years experience in near-shore drilling & site investigations
- Suitable for water depths up to 30m and high tidal zones
- Ideal for near-shore investigations involving bridges, ports, harbors, lakes and reservoirs
- Reduced footprint with no need for extended anchor points

SPECIFICATIONS

- Marineized drill rigs and direct-push capabilities
- Operates with moon-pool or jack-up barge
- NQ-PQ coring sizes
- Capabilities include: Rotary drilling, SPT, shelby tube, piston sampling, split spoon, ODEX, CPT & Seismic CPT
- Water depths up to 30m
- Dimensions vary depending on specific configuration
