

SEABED CPT

BENEFITS

- Coiled rod handling for continuous push to 45m
- Heavy-duty rods and high reaction force with specialized suction anchor for stiffer soils and deeper soundings
- Full-size 10cm² cone
- Decoupled from vessel with little to no downtime due to weather and vessel positioning
- Reduced exclusion zone and environmental/animal impact
- Remote operation reduces pollution and safety hazards for personnel
- Small and light footprint allows for 1/10th the cost of traditional seafloor mobilizations
- Tools and technology developed in-house to effectively work together (CPT, Seismic, sampling)

SPECIFICATIONS

- Umbilical/LARS or crane
- Interchangeable with ROV
- Rated up to 4000msw
- 10cm² cone w/optional seismic and thermal resistivity
- 45m depth below seafloor
- 9,000lb weight in air (up to 13,000lb with added weights)
- 35,000lb (15.8 metric tons) push capacity
- Suction base to achieve high reaction force up to 154MPa on cone tip
- Dimensions: 5m high, 2.1m diameter base
- Max slope: Self-leveling, ideal 0-18 degrees
